Abstract (en)

[origin: EP0180848A2] The concentrates contain 2-40% by weight of the VI improver in a solution of a) 10-100% by weight of a mixture of araliphatic hydrocarbons having a boiling range at normal pressure between 250 and 450 DEG C and a mean molecular weight above 300, and b) 0-90% by weight of a saturated aliphatic oxygenated compound having 8-40 carbon atoms.
