Abstract (en)
1. A tool support for clamping and suspending tools and utensils, particularly those with a handle, such as brooms, picks, hammers etc. under their own gravity, with a wall-mounted holder (1), characterized by a shear-shaped element being slewable in the vertical direction and comprising two shanks (2, 3) whose bent-off ends on the side of said wall holder (2.2, 3.2) have the form of axle journals rotatably mounted in said holder (1) with their pivot axes crossing in a plane parallel relative to said holder (1) and their free shank sections (2.1, 3.1) crossing to form a clamping area (5) within the range of their bent-off outer ends (2.3, 3.3), and with a ring loosely encircling the crossing point.

Abstract (de)
Der vorgeschlagene Gerätehalter besteht aus einem Trägerelement, in dem zwei Scherenschenkel mit je einem ihrer Enden, schwenkbar gelagert sind. Durch die zueinander geneigte, nicht parallele Anordnung der Schwenkachsen der Scherenschenkel in dem Trägerelement ist das Öffnen der Schere beim Anheben der beiden Scherenschenkel in dem zu klemmenden Gegenstand ebenso wie das Schließen der Schere bei seinem Absenken zwangsläufig und sicher auch bei "Einhand-Bedienung" gegeben.
