Abstract (en)
[origin: EP0181961A1] 1. Ignition system for an internal combustion engine with a capacitor (7) and an ignition coil, which comprises a primary winding (5) connected to ignition current switching unit (35) and a secondary winding (22) connected to the primary winding (5) in an auto-transformer series circuit, characterized in that to provide an impulse oscillator the capacitor (7) is connected to the secondary winding on its high voltage side and is connected in parallel to the series circuit of the primary winding (5) and the secondary winding (22).
