Abstract (en)
[origin: US4643784A] A method of applying and repairing veneers and the like comprises the following steps: sticking a sheet to the outside surface of the veneer; unsticking the veneer from its support; sticking the sheet to a substantially rigid transparent plate; repairing the veneer and then resticking it to its original support. For applying a previously made up mosaic coating, a transparent temporary support plate is used enabling the composition to be offered up for visual inspection prior to final fixing.
