Abstract (en)
[origin: EP0183001A2] 1. Backward head-wash unit comprising a washbasin (50) with water outlet, which is swingable about a perpendicular axis (3), characterised by the following features : a) a pillar (2) comprises a bottom part (1) to be mounted in situ, which is designed to receive fresh water and waste water services, b) the pillar comprises a top part (5) rotatable about a perpendicular axis (3) in relation to the bottom part and having a lateral cutout (47) of approximately the same size as the wash basin, c) the washbasin (50) is swingable about a horizontal axis in the top part within the cutout from a working position into a closed position, in which it at least partially closes the cutout, d) a drain-off basin (12) is fixed in position in the bottom part, and the washbasin has at least one drain outlet above the drain-off basin.
