Abstract (en)

[origin: US4688712A] A device (1) for impressing nailing plates (4) into beams (5, 6) to be joined together comprises a unit (3) with pressure platens (12, 12') for impressing the nailing plates (4), and a unit (7) movably mounted with respect to this unit (3), for compressing the beams (5, 6). The device (1) is fashioned to be displaceable in the longitudinal direction of the beams (5, 6) by way of rollers (23, 28, 34) or like guide means.
