Abstract (en)

[origin: EP0183939A2] In this multicontact electrical connector (2), with which a cover (1) can be latched, a cable-clamping device, having a clip (3), is allocated to the cover (1), which clip (3) is to be fixedly seated on the cover (1), in a detachable manner, via a connecting piece (4) in two different spatial positions relative to the cover (1). On the connecting piece (4), there are also cover pieces (5), which can be used to cover the opening zones in the cover (1) which are not occupied by the stress-relieved cable loom. <IMAGE>
