Abstract (en)
[origin: EP0184157A2] 1. Holding device for a curtain rod (5) with a decorative button (1) on which are disposed axially a pocket hole (17) and radially a recess (14) which penetrates its wall (13) to accommodate curtain rod (5) and having a holder (2) in the form of a hollow cylinder whose outer dimensions are essentially identical to the dimensions of axial pocket hole (17) in decorative button (1) and displaying a fastening piece (3) for fixing to a base surface and a holder (4) the wall of which displays axially on the end facing away from fastening piece (3) a slot (44) commencing at the end of the hollow cylinder facing away from fastening piece (3) and which is accommodated in axial pocket hole (17), wherein the hollow cylinder displays in its wall (41) an additional radial recess (42) displaced from the end of the hollow cylinder facing away from fastening piece (3) with essentially the same dimensions as recess (14) in decorative button (1), which basically serves a merely decorative purpose, to accommodate curtain rod (5) on a tangential plane and whereby recess (14) in decorative button (1) and recess (42) in the hollow cylinder are coincident when installed.
