Abstract (en)
[origin: EP0184776A1] 1. Table with a table top (14) which is pivotally mounted on a supporting frame (10) ; with two pivoting bearings (13) which are arranged some distance apart on the underside of the table top (14) and whose horizontal, coaxial, off-centre pivot axes (15) are arranged at one end of crossbars (12) on the supporting frame (10) ; and with a locking device to secure the table top (19) in a horizontal position, arranged on the underside of the table top (14), and which has two spring-loaded off-centre latches (20) which, with the table top (14) in a horizontal position, engage with respective retaining lugs (23) at the free end of the crossbar (12), characterized in that the locking device further exhibits a push rod (17) arranged on the underside of the table top (14) some distance from the pivoting bearings (13) and parallel to the pivot axes (15), to which push rod (17) the latches in the form of hooks (20) acting as spring-loaded catches are attached, and that a retaining lug (23) is arranged at the free end of each crossbar (12).
