Abstract (en)

[origin: EP0184948A1] This device, more particularly intended to equip an internal combustion engine ignition system, consists, starting from a smooth axle (2) of the ignition distributor, in making on the periphery of this axle a ribbed ring (3), on which there is force-mounted a plate (1) of a centrifugal advance regulator after contraction of the central hole of said plate (1) in a throat (4) of the axle contiguous to the ring (3), then in crimping the plate (1) on both sides of the ring (3). <IMAGE>
