Abstract (en)
[origin: US4630735A] The invention concerns generally the production of a folding box which serves for the reception of a plurality of drinking straws which can be removed from the folding box without touching one or the other end portions of them with the fingers. To attain this end, the blank used for making the folding box is provided with correspondingly arranged perforations which serve when the folding box is to be used for the obtainment of a completely novel arrangement of a pickup opening for the removal of the drinking straws.
