Abstract (en)
[origin: EP0185567A1] 1. A handling pallet converter formed of two identical parts each comprising two uprights (5) joined together so as to form a frame (8), characterized in that the parts are independent and that each upright has, at its upper part, a right angle bracket (9-12) able to come to bear under the upper cross piece (3) of the upper pallet, the distance separating the support edge (9a) of each bracket and the lower end (5a) of the upright being slightly greater than that separating the lower face (3a) of said upper cross piece and the ground.
