Abstract (en)

[origin: WO8600367A1] The mounting plate intended to be secured to a piece of furniture and to the arm of a hinge of a piece of furniture is comprised of two parts. It has an upper part (13) and a base plate (14) intended to be secured to the piece of furniture. Said base plate (14) is nested on its central area into a cutting (25) parallel to the longitudinal axis (20) of the upper part extending transversally to the base plate so that it may be adjusted and locked. The base plate comprises a threaded hole (16) wherein is included the threaded part (17) of a fixing screw (18) to lock the upper part (13) to the base plate (14). The threaded part (17) of the screw (18) passes through an elongated hole (19) of the upper part (13) so that the upper part is moveable transversally to the longitudinal axis (20) by loosening the screw (18).
