Abstract (en)
[origin: US4699415A] A portable device for transporting skis comprises a cradle (10) made of a material which is at least semi-rigid and comprising a web (11) which is generally horizontal and two flanges (12, 13) which are generally parallel and vertical and which together with said web define an upwardly open, U-shaped, ski-receiving channel. A belt (20) is fixed to the cradle (10) and is suitable for being worn by the user to hold the cradle (10) substantially at waist height and on the hip of the user.
