Abstract (en)
The present invention consists of a sonorous toy consisting of two symmetric bars (1,2) which are articulated with respect to each other in the manner of scissors and which are constantly forced away from each other by means of a spring (8), one side (4,5) of the bars being in the form of handles to drive or activate the toy while the opposite side (6,7) is in the form of hands, both hands facing each other in an applause position.
