Abstract (en)

[origin: EP0188327A2] An article carrier of the top-gripping type comprising a tray like structure having a top wall panel (18) formed with at least one row of apertures (A), each adapted to receive and retain an article (B) to be carried, a pair of side wall panels (16,20) and a pair of end wall panels (38,58) depending from the top wall panel. A reinforcing panel (14,22) extends from each of the side wall panels and is secured internally of the tray like structure to the top wall panel to brace the side wall panels relative to the top wall panel.
