Abstract (en)
[origin: EP0188731A2] The invention discloses an egg container comprised of a bottom portion (T, B) and a top portion. The bottom portion includes a tray member (T) and a base member (B), with the tray member (T) being adapted to fit within the base member (B). The tray member (T) is formed of a single piece of flexible plastic material, whereas the base member (B) is formed of a reinforcing paperboard or cardboard material.
