Abstract (en)
[origin: EP0189857A2] In the case of a multi-pin electrical connecting device, with a screw-driven connection, in order to use the manually applied connecting forces rapidly and safely, a safety catch (12, 13, 23) is arranged between a bush part (33) and a sleeve (19), which safety catch holds the plug part (33) in a unique, predetermined rotational position with respect to the sleeve (19), which position is required to produce the plug-in connection. <IMAGE>
