Abstract (en)
[origin: EP0190064A1] 1. A vandal-proof seat covering of use more particularly for seats in public places and vehicles and adapted to cover a resilient seat element made of a combustible and tearable material, such as a foam cushion, the covering consisting of at least three layers disposed one above another, viz. : a first visible outer covering layer (6) of a thin material, a second intermediate vandal-proof layer in the form of a steel wire network (8), a third layer (10) or sublayer for protection made of a flexible material, the three layers being rigidly interconnected to form a flexible composite covering by sticking or by means of a flexible adhesive interposed between the first and third layers characterised in that the intermediate layer consists of a knitted fabric (8) of thin steel wire and the third layer (10) is a fire-proofing layer (10) comprising at least one unwoven layer (12) produced by the tufting of synthetic fire-resistant fibres.
