Abstract (en)  
[origin: WO8601177A1] Foldable box (2) with origin closure, particularly for packaging drugs, comprising a box body (19) and at least one closure element for closing the box body (19). Between the closure element (12, 14, 20) and the box body there is provided a sealing which evidences any attempt at fraudulent opening. A reliable, simple and inexpensive sealing is obtained by means of a hollow (22, 24) provided in the box body (19) and located at a place such that a surface (20) of the closure element is situated behind when the foldable box (2) is closed, and by means of a layer (50) of cured thermoplastic adhesive forming a sealing and binding the closure element (12, 14, 18) and the box body (19). The invention also relates to a method for fabricating such foldable boxes.
