Abstract (en)
[origin: WO8601499A1] A Fischer-Tropsch catalyst comprises cobalt or iron on a support which is carbon having a BET surface area of at least 100 m²/g, ratio of BET to basal plane surface area not greater than 4:1 and a ratio of basal plane surface area to edge surface area of at least 10:1.

Abstract (fr)
Un catalyseur Fischer-Tropsch comprend du cobalt ou du fer sur un support en carbone possédant une surface spécifique BET égale à 100 m²/g au moins, le rapport entre le BET et la surface spécifique du plan de base ne dépassant pas 4:1 et le rapport entre la surface spécifique du plan de base et la surface spécifique de bord étant égal à 10:1 au moins.
