Abstract (en)

[origin: US4671182A] An inertia projectile includes a penetrator (1) and a caliber-compensating propellant cage (2). The propellant cage has at its rear front front wall (9) perforations (3) opening into a cavity (4). The cavity is otherwise completely closed by a front wall (7) conically extending relative to the penetrator (1) and by a surrounding cylindrical mantle (6).

Abstract (de)

Das Wuchtgeschoß besteht aus einem Penetrator (1) und einem kaliberausgleichenden Treibkäfig (2). Der Treibkäfig weist in seiner hinteren Stirnwand (9) Durchbrechungen (3) auf, welche in einen Hohlraum (4) münden. Der Hohlraum wird durch eine vordere, konisch zum Penetrator zulaufende Stirnwand (7) und einen Mantel (6) begrenzt.
