Abstract (en)

[origin: EP0191129A2] The cushion for preventing the development of decubitus ulcers and for treating already existing decubitus ulcers consists of a panel (4) in which a magnet coil (5) is arranged. The panel (4) is covered by a panel-shaped layer (3), connected to it, of a viscoelastic synthetic material. The cushion can be edged with a lining (2) of textile material. <IMAGE>
