Abstract (en)

[origin: EP0191290A2] The document holder clamp is arranged so as to be arrestable on the housing of the teletypewriter to the side of the outlet point of the recording medium. It fixes the sheet-type documents with the aid of clamping webs in such a way that the documents are automatically stabilised by this enforced bending and can thus project beyond the edges of the housing of the teletypewriter. <IMAGE>
