Abstract (en)

[origin: EP0191600A2] Polyphenyl-based liquid crystal compounds represented by the following general formula (1) and liquid crystal composition containing the same: wherein R' represents a straight or branched C₁₋₁₈ alkyl group, haloalkyl group, aralkyl group or haloaralkyl group with or without optically active carbon, R² represents a straight or branched C₁₋₆ alkyl group, haloalkyl group or aralkyl group with or without optically active carbon, W represents single bond, -O-, -OCOO-, -OCO- or -COO-, T represents a halogen atom or a methyl group, but when W is selected from the group consisting of single bond, -O- or -OCOO- T is only a halogen atom, X represents -OCO-, -COO-, -C=C-, -CH=N-, -N=CH, Y represents single bond, -O-, -COO-, -OCO-, -CH₂- or -COOCH₂- or -OCOCH₂-, Z, and Z₂ represent a hydrogen or halogen atom, a cyano group or nitro group, Z, may be the same or different from Z₂, n and m are one or more than one each and a total of n and m is three or more than three, the carbon atom marked with * is an asymmetric carbon atom.
