Abstract (en)

[origin: ES292268U] A standard rigid load-bearing metal framework for a convertible disposable packing case is made up of a bottom frame (1), a top frame (2), corner supports (3, 4) for joining these two frames (1, 2), and stiffeners (5, 6, 10) all assembled together by mechanical fixing means. This framework withstands all the mechanical stresses by itself and panels forming the sides, top and ends of the packing case are not subjected to these stresses. The packing case has the advantage that it can be supplied with its elements in a collapsed form and not yet assembled, and that it is inexpensive, while at the same time having the main advantages of standard containers.

Abstract (fr)

Une ossature métallique rigide, porteuse, standardisée, est formée par un châssis-plancher (1), un châssis-toit (2), des montants d'angle (3, 4) pour réunir ces deux châssis (1, 2), et des éléments raidisseurs (5, 6, 10) assemblés par des moyens de fixation mécanique. Cette ossature supporte à elle seule toutes les sollicitations mécaniques, tandis que les panneaux formant les parois de l'emballage sont exemptés de ces sollicitations. L'emballage a l'avantage d'être livrable sous forme compactée de ses éléments non encore assemblés et d'être bon marché tout en ayant les principaux avantages des conteneurs standardisés.
