Abstract (en)

[origin: EP0192247A1] 1. Spray apparatus for the spraying of flowable media onto workpiece surfaces, especially onto inner sides of cavities, comprising essentially at least one spray gun provided with a nozzle head and attached to a nozzle carrier, in which the spray gun is supported flexibly in a longitudinal direction and a device is provided for sensing the pressure on the spray gun, characterised in that the device for sensing the pressure is a force sensor (5, 5') which is arranged between the nozzle carrier (carrier frame 4) and the spray gun (2).
