Abstract (en)

[origin: EP0192254A2] In a multi-pin terminal adaptor for carrying a large number of electrical leads through a wall (10), especially of a switch or control cabinet, having a housing (14) which can be mounted on the wall, a duct base (16) is cast as a single-piece component, which stands proud of the wall (10) on the inside and outside. The individual leads (26) are collected in the interior of the switch or control cabinet and are mechanically and electrically connected to a plug contact piece (22) which can be mounted on the inner side of the duct base (16). <IMAGE>
