Abstract (en)

[origin: EP0192621A1] The invention concerns a seal device for preventing leakage between an impeller and its surrounding housing. According to the invention the impeller (1) and the housing (2) are provided with one seal ring each (3) and (4) resp, which together form a mechanical seal device. At least one of the rings (3) is attached by help of an O-ring (5) in a slot (6).
