Abstract (en)  
The invention relates to a radiation panel suspended in a heating furnace, comprising at least two suspending rod means (12) suspended from the upper wall (11) of said furnace at a predetermined distance; a beam means (17) connected to the lower part of said at least two suspending rod means (12); a plurality of longitudinal frames (19) which are arranged in parallel with each other and have respective lower ends supported by said beam means (17); a plurality of ceramic boards (20) which are vertically arranged between adjacent said longitudinal frames (19); and a lateral frame (16) connected to the upper part of said suspending rod means (12) to support the upper ends of said longitudinal frames (19).
