Abstract (en)

1. A tool-holding device for tools which more especially have a conical fastening part, comprising a carrying plate having openings into which are inserted reception bushes having several supporting bodies which are distributed uniformly over their circumference and which are adjustable by degrees and exchangeable in their radial position and which have a free abutment surface which is adapted to the fastening part of the tools, characterized in that the reception bushes (11) are designed as annular bodies having a cylindrical outer surface (15), the inner surface (16) of which has, side-by-side in the circumferential direction, reception apertures (22 - 25) having different radial depths for the supporting bodies (12).

Abstract (de)

Bei dem Aufnahmeträger für Werkzeuge sind Aufnahmebuchsen (11) vorgesehen, die mehrere in ihrer Radiallage stufenweise verstellbare und auswechselbare Stützkörper (12) aufweisen. Die zylindrische Innenmantelfläche (15) der Aufnahmebuchsen (11) weist in Umfangsrichtung nebeneinander Aufnahmeöffnungen (22 - 25) mit unterschiedlicher radialer Tiefe für die Stützkörper (12) auf.
