Abstract (en)
1. A draft-proof flexible curtain for a concertina-type door, said door including two vertical posts (1) having a U-shaped section, the tops of said posts being interconnected by a horizontal beam (4), said door further including a motor (5) for driving a shaft (6) to wind up door-lifting straps (7), and a flexible curtain (8) which is stiffened at regular intervals by reinforcing bars (9), said lifting straps being fixed to the bottom reinforcing bar and being guided via guides (10) located on at least some of said reinforcing bars, said curtain being characterized in that respective draft-proofing strips (12) are located along its side edges, said strips being made of flexible material and coming into contact with the bottoms of said U-shaped posts.
