Abstract (en)

[origin: WO8601883A1] In a dough product dryer (1) with an insulating jacket surrounding the dryer and whose side components consist of individual externally-convex wall elements (10) which can be clamped in their peripheral regions against frame sections (13) of the dryer, the wall elements (10) are convexely curved in the form of a cylinder section and the relevant frame sections (13) are correspondingly shaped to match.
