Abstract (en)

[origin: EP0194500A2] The window or door has a frame (14) fixed in the masonry and a leaf (12) held in the frame pivotably on one side. The security device consists of a mounting (20) and a security bolt (22). The mounting (20) is fastened to at least one leg piece (16) of the leaf (12). The mounting (20) has a guide orifice extending obliquely in the direction of an adjacent leg piece (18) of the frame (14) and guided through this into the masonry. The security bolt (22) is pushed into the security orifice and locked. <IMAGE>
