Abstract (en)  
[origin: EP0194513A1] A shelf in which the supports consist of a component (13) with an engagement piece (10) and a component (14) which is inserted telescopically into this component (13). This inserted component (14) has two branches (21, 22) which are linked to one another by a lockable articulation (16). The merchandise receptacle is secured to the front member (22). By this configuration the merchandise receptacle can be more or less pushed forward with the component (14) and oriented upward or downward by means of the articulation (16).
