Abstract (en)  
[origin: EP0194616A2] 1. Printing unit for an offset rotary printing machine having at least one rubber blanket cylinder (3, 4) associated with a plate cylinder (1, 2), onto which a supported rubber blanket can be clamped, characterised in that seen in the peripheral direction the support layers (6, 7, 8, 9) are of varying thickness and in that each of the support layers (6, 7, 8, 9) is assigned to a rotary speed range corresponding to the desired operating speed of the machine, and in that the arrangement of the areas (10, 11) of varying thickness corresponds with regard to size and position to the oscillation characteristics determined individually for each machine.
