Abstract (en)
[origin: EP0196368A1] 1. A round plug, particularly for watertight plug connections, with a conductor connecting member (1), a sleeve-shaped housing member (3) connected thereto and a sleeve-shaped contact member (8) which is constructed of spring arms (7) attached to the housing member (3) which are substantially parallel and at a distance from each other and extend forwards to a plug opening (6), characterised in that a collar (10) at the ends of the spring arms (7) on the side of the plug opening attached in the form of a band of material extending transversely to the spring arms (7) and is tightly enclosed on the end regions of the spring arms (7) in order to form rounded front edges enclosing the plug opening (6).
