Abstract (en)
[origin: EP0196877A2] A moving platform for use in exercising, said platform comprising a fixed platform (38) of flat rigid material, a continuous belt (24) having an upper run (25) supported by said platform, a first layer (40) consisting of shock absorbent material mounted between said fixed platform (38) and said belt (24) and a second layer (42) consisting of polymeric, low friction, low compliance material mounted adjacent said first layer (40), to facilitate movement of said belt (24) relative to said fixed platform (38).
