Abstract (en)
[origin: EP0196996A1] 1. Articulated bracelet with links, composed of a set of inner elements articulated to one another and a set of outer elements each of which encloses an inner element, the width of the outer element corresponding, with a slight clearance, to the distance between the axes of articulation of the inner element, characterized in that the outer element (10, 12) consists of two parts, namely a part in the shape of a bridge (26) and an ornamental flat part (30), in that the part in the form of a bridge (26) is welded to the latter in order to form the outer element in the form of a tunnel, and in that the inner element (14) is joined by pins (20) to the adjacent inner elements, the part in the form of a bridge (26) of the outer element having a horizontal interior surface which is slightly arched and intended to be accommodated in a corresponding recess (24) of the inner element, or vice versa.
