Abstract (en)

[origin: EP0197244A2] 1. Packing for devices which may be removed from a surrounding container and which are mounted such that they are guided in the container between holding ribs formed of cardboard, characterised in that when used in the packaging of axial fans having a multi-blade fan wheel secured to the motor shaft end of a drive motor and radially projecting above the motor housing, U-profiled main cardboard strips (2; 3 or 4; 5 respectively) with wall portions (21, 22; 31, 32 or 41, 42; 51, 52 respectively), which extend in the longitudinal direction of the cardboard strips and are erected laterally, are set up on a packing base (12 or 13 respectively), and the motor-side end (6; 7; 8) of each axial fan is inserted between the wall portions in an inclined position in such a way that the fan wheels (9; 10; 11) of the axial fans, inserted one after the other, overlap each other in the longitudinal direction and, in each case, a motor of an axial fan is arranged between two blades of the fan wheel of the following axial fan.
