Abstract (en)

[origin: EP0197522A1] 1. A picture frame with an information plate (3, 30) which carries information on the picture held in the frame (1) for a person looking at the picture, the information plate (3, 30) forming part of the picture frame (1) and the parts of the frame being pivotably connected to each other so that in the pivoted-out state a surface (31, 31') of the information plate which is arranged so as to be hidden in the frame (1) is directed at the person looking at the picture so that it is visible, characterised in that the information plate (3, 30) is one of the frame bars (21, 22, 23, 24) which is articulated to the frame (1) at its outer edge (23').
