Abstract (en)
A container assembly for use on a ladder has a trough shaped container part 1 (preferably moulded in plastics) with a hook 8 by which it is hung from a ladder rung 9. The assembly is stabilised on the ladder by arms 10 which are extendible from the base 2 of the container part to abut the ladder uprights 12, 13. The arms 10 are preferably slidably extendible and mounted in channels formed in the underside of the base 2 by through-moulding.
