Abstract (en)

[origin: ES8800019A1] This invention relates to processes for making jewelry comprising one or more rows of precious stones set in a support made of precious metal. One or more rows of cylindrical housings extended by a conical seating and a counter-bore are machined in the support the metal bridges separating, the housings are cut out with a rotating mill a stone is placed in each housing and is set by means of a tool which is applied on the islets of metal remaining between the housings.
