Abstract (en)
[origin: WO8602078A1] New 24-homo-vitamin D compounds, methods for preparing the same and novel intermediate compounds. The compounds are characterized by vitamin D-like activity of the order of 1\$g(a),25-dihydroxyvitamin D3?, the recognized circulating hormonal form of vitamin D, or various of its derivatives and are useful in the treatment of disease state characterized by calcium-phosphorous imbalances.

Abstract (fr)
L'invention porte sur de nouveaux composés de 24-homo-vitamine D, sur leurs procédés de préparation et sur de nouveaux composés intermédiaires. Les composés se caractérisent par une activité analogue à celle de la vitamine D de l'ordre de la 1alpha,25-dihydroxyvitamine D3, la forme hormonale circulatoire reconnue de la vitamine D, ou de plusieurs de ses dérivés, et son utiles dans le traitement d'états pathologiques se caractérisant par des déséquilibres de calcium-phosphore.
