Abstract (en)

[origin: EP0198187A2] The box pallet is in the form of a folding box with a glued and/or tacked cut edge - factory edge - for forming the ring of box walls and bottom flaps, folded onto the lower edge, and an invertible lid which can be placed on top as a stackable large package, in particular for bulk products. For this purpose, wall tabs, which are joined on via a double fold, may be provided on the upper edge of the side walls for folding over as the respective inside wall and transverse grooves may be provided on the foldable wall tabs for insertion in the lower part, insofar as the size of the box is greater than its width.
