Abstract (en)

[origin: EP0198210A2] 1. Control device intended for a motor vehicle for locking the door on the inside, with an outer portion comprising a shaft and a lock knob which is disposed slidably in the shaft and connected to a control rod for locking the door, characterised in that to connect the control rod (5) to the lock knob (4, 40), on the lock knob (4, 40) is provided a yoke portion (21) which consists of a main body (20) and a latching piece (6, 44) which can be inserted therein, and the yoke portion (21) is designed for two-stage latching of the latching piece (6, 44) in a stand-by position, in which the yoke portion (21) is slidable over the control rod (5), and in a locked position in which the control rod (5) is held fast in the yoke portion (21).
