Abstract (en)
A card cartridge display system is provided which includes a base member that supports a number of card cartridge carriers. Each carrier contains a number of card cartridges tiltably arranged in substantially face-to-face order in the carriers for easy viewing. The cartridges contain greeting cards or other card-like objects. The carriers are arranged one behind and above the other in an upwardly stepped configuration with the first, bottom carrier located at the front end of the base member next to a potential purchaser of the greeting cards.
