Abstract (en)
[origin: WO8502545A1] A non-infectious sub-unit vaccine for use against infectious bursal disease (IBD) virus comprises the structural polypeptide of approximate MW 32 Kd contained in the IBD virus, or an immunogenic peptide derived therefrom, together with, if desired, an adjuvant. A method of increasing the level of protective antibodies in poultry by administering the vaccine, and diagnostic methods are also disclosed.
