Abstract (en)  
[origin: EP0198983A2] A panel for a grid ceiling in which a first panel member (10) is provided with slots (20) and, between the closed ends (25) of these slots and the webs (14) of the flanges, with apertures (34). Second panel members (12) have cooperating slots (50) with inturned lugs (48, 50) which engage in the aperture (34) to rigidify the cross-over points adjacent the webs (14). Further lugs (56, 58) on the first panel may engage in openings (50) in the second panel members.
