Abstract (en)
[origin: EP0199116A1] 1. Stacker with lifting unit (7) of double-arm construction, which is mounted at an inclination in a push frame (3), whereby a pushing member (4, 5) is disposed between the vehicle frame (1) and the push frame (3) and an inclined member (9, 10) disposed between the latter and the lower lever arm of the lifting unit (7) characterised in that the swivelling connection of the pushing member (4, 5) to the push frame (3) is effected via one end (23) of a double-arm, transverse lever (15) which is mounted so that it can be swivelled at the push frame (3), the other end of the transverse lever being secured to that it can be swivelled at the lower lever arm (16) of the lifting unit (7).
